

Company Policy

Swagefast endorses the concept of sustainable development, which goes far beyond conservation to include a sustained growth philosophy which respects nature in the interest of long-term development. Subscribing to this viewpoint simultaneously implies a realisation that protecting nature, or at least ensuring a more efficient use of natural resources, is in the long-term interest of business.

Environmental Management System

Environmental Management System is to be built into *Swagefast*' existing management system, enabling the Company to identify any negative effects its business might have on the environment, and to set appropriate goals to address them.

Energy Efficiency/Water Saving

Electricity consumption was reduced by fitting energy efficient heat/cooling reclaim systems. All our lighting will be electronic ballast in the future. Air-Conditioners must be energy star compliancy certified in future.

Health, Hygiene and Safety

The health of employees is protected and promoted by providing them with a clean and hygienic environment in which to work.

Environmental Staff Awareness

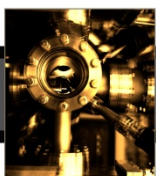

As part of the Company Induction, new employees are made aware of *Swagefast*' commitment to the Environment. Thus ensuring that employees at all levels throughout the Company, see environmental responsibility as part of their jobs and not an additional function.

Awareness of Consumer Concerns

Through effective communication, Swagefast seeks to create an awareness of environmental issues amongst its employees, customers and local communities i.e. enviro facts and recognition of major environmental events.

Waste Management

Swagefast will ensure an efficient and environmentally safe disposal of all waste generated. It will also aim to increase the proportion of waste recycled.

Swagefast
